

Sunray Elementary School

Summer Learning

Students will need to log-in to their myPasco Connect dashboard to access the recommended apps.

Math Kindergarten – 5th Grades

Students have already been placed in the appropriate grade level lessons. These series of lessons deeply explore the big ideas of math to build strong connections that students will need during the upcoming school year. Students should work through the lessons and activities independently. One lesson should take about 20-30 minutes. The goal is to complete one lesson each day.

Reading/Writing Kindergarten - 5th Grades

Lexia Core 5 will automatically place students in the appropriate lesson once they have completed the placement test that is built into the program. Students should work through the lessons and activities independently.

Read a book of choice – 30 minutes per day (this could be done WITH a parent/sibling/etc.)

Science

Students could spend at least 30 minutes exploring a topic of interest to them on Discovery Ed.
